Structures

Overall, the population in this region resides in structures that are resistant to earthquake shaking, though vulnerable structures exist. The predominant vulnerable building types are adobe block and rubble/field stone masonry construction.

Historical Earthquakes

Date	Dist.	Mag.	Max	Shaking
(UTC)	(km)		MMI(#)	Deaths
1975-03-13	334	6.9	VIII(266k)	2
1985-01-26	145	5.9	VIII(38k)	6
1985-03-03	164	7.9	VII(5,319k)	177

Recent earthquakes in this area have caused secondary hazards such as landslides and liquefaction that might have contributed to losses.

Selected City Exposure

from GeoNames.org

MMI	City	Population
٧	Los Andes	57k
IV	Vina del Mar	295k
IV	San Felipe	59k
IV	Quilpue	130k
IV	Chicureo Abajo	18k
